Experience

The Tony Kinnett Cast

Revenue & Growth Operations Analyst

Aug 2024–Present

Indianapolis, IN (Remote)

- Analyzed monetization performance across advertising, memberships, and donations using audience behavior metrics, revenue analytics, and engagement data to assess monetization readiness, support go-to-market decisions, and directly drive growth to five-figure monthly recurring revenue.
- Evaluated content structure, engagement signals, view duration, click-through behavior, and SEO-driven discovery factors to optimize hooks, pacing, and ad timing, contributing to an $\sim 8\times$ increase in views.
- Designed and maintained a Python-based ETL pipeline integrating Nielsen, YouTube, X, and Megaphone data into PostgreSQL, enabling consistent cross-platform performance analysis while reducing manual reporting effort by 50%.
- Conducted recurring performance analysis using platform analytics, cohort analysis, and A/B testing to compare episode-level outcomes, evaluate content and monetization experiments, and inform ongoing optimization strategies.

The Daily Signal

Data Consultant

Oct 2024–Dec 2025

Washington, D.C. (Remote)

- Engineered and owned a Python-based analytics pipeline ingesting monthly CSV and API data from multiple platforms, performing data cleaning, joins, feature engineering, and derived KPI computation to support leadership-facing performance reporting.
- Executed recurring statistical analysis and time-series forecasting (t-tests, OLS regression, Mann–Whitney U, Prophet) to identify significant performance trends and inform publishing cadence and content strategy decisions.
- Drove platform growth initiatives through data-driven insights, contributing to first-6-month performance lifts of +45% website traffic, +1,430% Facebook reach, +430% X impressions, and +170% YouTube views.
- Applied k-means clustering and TF-IDF topic modeling as a recurring analytical framework to identify high-engagement content themes and optimize multi-platform content distribution strategy.

Chalkboard Review

Data & Analytics Coordinator

Nov 2020–Nov 2022

Remote

- Produced recurring analytics reports for editorial and marketing teams using Google Analytics, Facebook, and Twitter data to identify performance trends and inform publishing decisions.
- Developed and maintained performance dashboards in Excel, Power BI, and Tableau, enabling consistent monitoring of website and social KPIs during growth to 500K monthly readers.
- Assessed social media growth and engagement from launch through scale, contributing to expansion to 2.2M Twitter impressions and 120K Facebook reach in the final month prior to acquisition.

Education

George Mason University

MA, Economics (GPA: 4.0)

Aug 2024–May 2026 (Expected)

Lenoir-Rhyne University

BA, Economics with Honors; Minor in Finance (GPA: 4.0)

Aug 2021–May 2024

Projects & Skills

- **Are MLB Teams Spending Smarter?: An ROI Analysis of Payroll vs. Performance** — Built SQL + Python pipeline integrating Lahman & Neil Paine WAR datasets; regression showed payroll explained only $\sim 12\%$ of wins, with diminishing returns above $\sim \$150\text{M}$. Identified small-market teams (Rays, A's) achieving $\sim 3\times$ efficiency.
- **User Behavior and Citi Bike: A Study of Behavioral Economics and Data Analytics** — Analyzed 30M+ NYC bike-share rides in R with geospatial mapping and hypothesis testing; uncovered significant differences in distance, duration, and station choice, informing pricing and access policy.
- **Threshold Forecasting Under Rare Events: Mini-Golf Milestone Prediction** — Applied Bayesian survival and Monte Carlo simulation to forecast rare-event timing; estimated pooled priors via Kaplan–Meier and log-normal AFT models, identifying back-nine inefficiency as key bottleneck with only a 0.93% success rate.
- **Skills:** SQL, Python, R, Tableau, Power BI, Git/GitHub, LaTeX, pandas, NumPy, scikit-learn, XGBoost, matplotlib, ggplot2, Prophet, econometrics, statistical modeling, machine learning, time-series forecasting, clustering, classification, A/B testing, ETL pipeline design, data engineering, data visualization, database management
